

Minutes of KURRI-FFAG collaboration meeting (SM)  
14:00 – 14:30 BST, 10 May 2012

1. Algorithm to simulate multi-turn injection was discussed. Chris P use a method to vary charge for individual particle instead of throwing away at each injection. Shinji believes his method which assumes the same charge for individual particle is still correct, he needs more clarification on this. Chris, Shinji and other interested parties should get together after IPAC to discuss the various methods to simulate.
2. Since Mori-san was not available today, we could not ask him the current plan of experiment date later this year. We better to make more detail schedule. The experiment could be planned right after FFAG 12 workshop.
