

KURRI FFAG MEETING 13/04/2017
BlueJeans VC meeting

Attendees:

S. Sheehy, D. Kelliher, S Machida, C. Prior, C. Rogers - RAL
F Meot, J. S. Berg - BNL
M. Haj Tahar - Columbia
Y. Mori, Y Ishi, T Uesugi, Okita - KURRI

1. Ishi-san introduced Okito-san to the meeting, who will be doing his PhD with Mori-san on the MERIT project.
2. Discussion of PP server – it is now working and used for this meeting. It should be possible to grant access to external members, please contact Chris Rogers
3. KURRI machine status update (Ishi-san)
 - A number of tubes on the DTL were found to be dead. Purchase order has been placed to replace them. 3 tubes to be delivered in 2 weeks. But one will take longer, around 1.5 months. May try to operate beams with weaker field in DTL2 (80%) before then.
 - At earliest, beam testing will start from mid-May.
 - Additional beam time constraint for us is one other user who has priority (~1 week beam time).
4. Malek gave a short informal update.
 - He is now at Columbia University. He will upload a copy of his thesis to the web server
 - He gave a short update on work to build a facility to treat pancreatic cancer, and a small test facility machine for carbon beam tests using rats.
5. Next meeting will be 25th May (the week after IPAC).
