

Web server for the collaboration

Shinji Machida
01 March 2017

Server for the KURRI FFAG collaboration

- hadron.kek.jp will not be available after March.
- The server stores all the data not only for this KURRI FFAG collaboration.
- However, I think this collaboration is only active part on the server at the moment (?)
- We have setup the mirror of hadron.kek.jp (only for this collaboration part) on <http://ffag.pp.rl.ac.uk/colabo/> (or <http://ffag.pp.rl.ac.uk/collabo/>) which is online now.

My proposal

- Make hadron.kek.jp offline (could be still on line, but do not update the content.)
- Keep <http://ffag.pp.rl.ac.uk/colabo/> (or [.../collabo/](http://ffag.pp.rl.ac.uk/collabo/)) up to date from now on as the main server.
- In the mean time, Kuriyama-san transfers all the data, not only for the KURRI FFAG, from hadron.kek.jp to the new server.
- At the point the new server is up, setup the connection between the master and the mirror.
